DETAILED ACTION

1. According to paper filed on Sep. 3, 2009, the applicants have elected group I with traverse for further prosecution.

Response to Arguments

2. Applicant's arguments filed on Sep. 3, 2009 have been fully considered but they are not persuasive. The examiner does not agree with the applicants arguments that optional bond between atom D and a transition metal atom is the special technical feature of the instant compounds. First of all, as admitted by the applicants, this bond is optional and is neither this bond nor metal is present in compounds of formula (4). Secondly, as stated clearly in the last office action, the inventions of different groups do not relate to a single inventive concept since there is no common core which in the Markush Practice, is a significant structural element shared by all of the alternatives. In the instant case, the variables D, D', Cy2, Cy3, Cy1, E, Y and Y' are critical for the common core of the instant compounds. Thus, restriction requirement as indicated is proper and thereby made final.

In regard to compound of example 88, these compounds will represent group VIII, directed to compounds of formulae (2) or (4) where both E and Y represent C, Cy3 and CY2 rings are 6-membered monocyclic aryl rings and CY1 ring is 6-membered heteroaryl ring containing only i nitrogen atom where D or D' represent N atom (see

example 88), a process for preparing these compounds and methods of using these compounds.

3. Claims 23-43 are pending in the application.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 23-43 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In independent claims 23, 33 and 36, the value of variable R2 is not defined.

In claim 41, the term --- characterized in that --- is vague. The applicants are suggested to use the term --- wherein ---.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 33-35 are rejected under 35 U.S.C. 102(b) as being anticipated by Fabre (U.S. Patent 4,128,650, cited on applicant's form 1449).

Fabre discloses Dibenzo[de,h]quinoline derivatives. The compound of formula II (see col. 1, lines 40-50) where x represents H which is used as starting material (see examples 2 and 4) anticipated the instant claims when variable Y' represents CR2 (C=O) group in the instant compounds of formula (4).

7. Claims 23-43 are objected for containing non-elected subject matter.
